

ACTIVE SPHERE | 5 · 10 · 15 · 25 CM

LIVING WATER TECHNOLOGY

ACTIVE SPHERE

A spherical element of G.R.A.I.L. technology - for a jug, bathtub, pool or garden pond. No electricity, no filters and no replacement parts. Available in four diameters, in stainless steel or copper.

- PRODUCT GUIDE

ABOUT THE PRODUCT

What is the Active Sphere

02

The Active Sphere is the resonant heart of Living Water Technology's **G.R.A.I.L.** technology. Placed in water or right next to a vessel, it works silently - no power supply, no chemicals and no parts to replace. Available in diameters from 5 to 25 cm, it works as well in a jug as in a pond.

The idea behind G.R.A.I.L.

The Living Water Technology concept holds that the character of water depends not only on its chemical composition but also on how its structure is organised - two samples with identical composition may behave differently.

G.R.A.I.L. technology (PL patent application no. P.453982) uses reference water sealed inside the sphere, intended to organise the structure of liquid within its range.

Why a sphere?

According to the manufacturer's concept, a spherical form acts evenly in all directions, creating an organising field around itself. Its range depends on the diameter - the larger the sphere, the larger the body of water it can serve.

That is why the small 5 cm sphere is used at home, while 10-25 cm spheres are used in garden ponds, pools and lakes.

60%

Declared ortho-cluster level

According to the manufacturer, water within range of the Active Sphere reaches a structure of approx. 60% ortho-clusters (G.R.A.I.L. reference water: 100%).

No power supply

Needs no electricity or connection - works continuously whenever it is in or next to water.

No replacement parts

No filters or cartridges to replace. Buy the sphere once and use it for years.

Steel or copper

High-grade stainless steel in all sizes; the 5 cm version is also available in copper.

HOW TO USE

How to use the Active Sphere

03

The Active Sphere needs no installation or set-up. Simply place it in water or right next to the vessel - then it just stays there.

1

SELECTION

Choose the size for the volume of water

5 cm sphere - jug, carafe, bathtub. 10, 15 and 25 cm spheres - garden ponds, pools, SPAs, lakes and large tanks (p. 05).

2

PLACEMENT

Put the sphere in water or next to it

Place the sphere in a jug, carafe, bathtub or tank - or directly next to a container of water.

3

TIME

Wait a few minutes

According to the manufacturer, the first changes in structure occur after a dozen or so seconds, and full activation after approx. 3-5 minutes.

4

READY

Use the water

The sphere can stay in the water permanently - there is nothing to switch off, charge or regenerate.

Care and storage

Do not heat or freeze

Do not boil the sphere with water or put it in the freezer. Remove it before heating water.

No dishwasher or microwave

Wash the sphere by hand under running water and dry it. Do not put it in a dishwasher or microwave.

Away from electronics

Store the sphere away from phones, computers and electromagnetic devices - ideally in its original packaging.

APPLICATIONS

Where the sphere works best

04

The Active Sphere accompanies water at home and outdoors - from a jug on the table to a pond in the garden. Its diameter is what decides where it fits best.

At home – 5 cm sphere

Water and drinks

The sphere in a jug or carafe of drinking water - on the table, in the kitchen, at the office.

JUG · CARAFE

Tea and herbs

Water prepared with the sphere before brewing - remove the sphere before heating.

INFUSIONS · TEAS

Cooking

Water for soups, stocks, sauces and compotes - prepared before cooking.

SOUPS · STOCKS

Watering plants

The sphere in a watering can or tank of water for house and garden plants.

WATERING CAN · TANK

Washing fruit and vegetables

A bowl of water with the sphere for rinsing fruit, vegetables and herbs.

FOOD PRODUCTS

Bathing

The sphere placed in the bathtub while filling and bathing.

BATHTUB

Outdoors – 10, 15 and 25 cm spheres

Garden ponds and small tanks

Garden ponds, fountains and small tanks.

10 CM SPHERE

Pools, SPAs, hot tubs

Home pools, SPA tubs and larger water installations.

15 CM SPHERE

Ponds and lakes

Ponds, lakes and large bodies of water.

25 CM SPHERE

The Active Sphere is not a filter and does not remove contaminants. **It does not replace pool water treatment, filtration or disinfection** *- care for your pool and SPA in line with the installation manufacturer's recommendations.*

CHOOSING A SIZE

Four Active Sphere sizes

05

All spheres work with the same G.R.A.I.L. technology. Their range grows with the diameter - so the size is chosen to match the amount of water and where it is used.

5 cm sphere

- Jug, carafe
- Kitchen, bathing
- Home use

MATERIAL **steel / copper**

10 cm sphere

- Garden ponds
- Small tanks
- Home and garden

MATERIAL **steel**

15 cm sphere

- Pools
- SPAs, hot tubs
- Larger installations

MATERIAL **steel**

25 cm sphere

- Ponds, lakes
- Large tanks
- Water ecosystems

MATERIAL **steel**

Size comparison

Material	**steel / copper**	**steel**	**steel**	**steel**

5 cm spheres also form the final stage of the **Full Home System** *- five active spheres (copper or stainless steel) in the last housing, after mechanical filtration, activated carbon and shungite.*

5 cm sphere: steel or copper?

5 cm sphere | Stainless steel Ø 5 CM

- Corrosion-resistant, neutral in contact with water
- Versatile - water, drinks, cooking, bathing

5 cm sphere | Copper Ø 5 CM

- High-grade copper - develops a natural patina
- For water - choose steel for acidic drinks

Common specification

PARAMETER		VALUE
Diameters	→	5 · 10 · 15 · 25 cm
Material	→	Stainless steel; 5 cm also in copper
Technology	→	G.R.A.I.L. - PL patent appl. no. P.453982
Declared structure	→	approx. 60% ortho-clusters
Power supply	→	Not required
Operation	→	No filters or replacement parts
Packaging 10-25 cm	→	Wooden box with insert
Made in	→	Poland

FREQUENTLY ASKED QUESTIONS

FAQ

Does the sphere need electricity or batteries?

No. The Active Sphere is a passive product - it has no power supply or electronic components.

Does the sphere have to go into the water?

The sphere can be placed directly in water - in a jug, bathtub or tank - or right next to a container of water.

Which size should I choose?

It depends on the amount of water: 5 cm for the home, 10 cm for garden ponds, 15 cm for pools and SPAs, 25 cm for ponds and lakes. Comparison on p. 05.

Steel or copper in the 5 cm size?

Steel is corrosion-resistant and neutral in contact with water. Copper develops a patina over time; for acidic drinks we recommend the steel version.

Does the sphere purify water?

No. The sphere is not a filter and does not remove contaminants. Nor does it replace pool water treatment or disinfection.

How do I look after the sphere?

Wash it by hand under running water and dry it. Do not heat, freeze, put it in a dishwasher or place it in a microwave.

Is it a medical device?

No. The Active Sphere is not a medical device and is not intended to diagnose, treat or prevent any disease.

Where can I buy the sphere?

Orders are handled by Living Water Technology Partners - see the partner list at livingwatertechnology.com.
